DESIGNER & DEVELOPER

OMBU   2013 - Present

LEAD USER EXPERIENCE DESIGNER

OMBU is a digital technology firm specializing in websites, applications, content management systems, and cloud infrastructures. I lead our clients through design discovery exercises, produce detailed wireframes, prototypes, and comps, and audit design fidelity throughout implementation.

Epoch Inc.   2011 — 2013

LEAD USER EXPERIENCE DESIGNER

Epoch's flagship product is a web-based software service that automates video production workflows. I designed the user experience and created desktop & mobile wireframes to guide development. I was also responsible for managing outside graphic design work and occasionally illustrated image assets.

SENIOR FRONTEND DEVELOPER

I wrote Rails code for Epoch's web application, largely using Ruby, Slim, SASS, CoffeScript, and an assortment of other template languages, all of which boil down to HTML5, CSS3, and JavaScript when served to the browser. We used Git to manage our source code and Pivotal Tracker to document tasks & stories.

Atom Driven   2003 - Present

OWNER & OPERATOR

I incorporated Atom Driven in 2003 to formalize the freelance web design & development projects I'd been doing for years. I specialize in small, robustly written websites with an emphasis on accessibility and web standards. I offer a full set of web-related services and am responsible for all website production tasks from design to deployment, working closely with clients throughout.

Hewlett Packard   1995 — 2011

INTERACTION DESIGNER

I joined HP's internal design team in 2009. I was the lead interaction designer for an ink cartridge subscription program and managed UI designs for the touchscreen applications of our web-enabled Photosmart printers. In both projects, I was responsible for creating wireframes and interactive prototypes.
